4763 Sherwood Dr
Pittsburgh, PA 15236

EDUCATION

Carnegie Mellon University, Pittsburgh, PA

Ph.D. Mechanical Engineering GPA: 3.9

2009-2013

Thesis: Thermal Modeling of Disordered Materials

Advisor: Alan J.H. McGaughey

Coursework: molecular and electron structure simulation, nanoscale transport phenomena

University of Pittsburgh, Pittsburgh, PA

M.S. Mechanical Engineering GPA: 3.7

2007-2009

Thesis: Statistics of Particle Concentrations in Free-Surface Turbulence

Advisor: Walter I. Goldburg

Coursework: quantum and statistical physics, chaos and nonlinear phenomena

B.S. Mechanical Engineering GPA: 3.2

2007-2009

Research: FEA modeling of novel flow chamber to study development of aneurysms.

EXPERIENCE

Carnegie Mellon University

Teaching Assistant - 24-322: Heat Transfer

2010-2012

-Topics in conduction, convection, radiation and heat exchangers. Supervised recitation sessions and substituted for lectures.

University of Pittsburgh

Teaching Assistant - Advanced Fluid Mechanics

2008

-Topics in fluid mechanics including viscous flow, boundary layer theory, and scale similarity.

Lecturer - Physics

2007-2009

-Administered lectures to undergraduate students, graduate students, and faculty on topics ranging from mathematics, turbulence, bio-physics, statistical physics, and nonlinear phenomena.

Precision Therapeutics

Intern - Technology Development

2006-2007

- Worked with a team of software developers, information technology specialists, and laboratory equipment specialists.

- Used (computer-aided drafting and design) **CADD** to design components of optical microscopes and their automation controls.

- Assisted in fabrication of microscope components and laboratory equipment.

SKILLS

Computing Languages: Matlab, Python, Latex, Shell, Fortran, C/C++, Java, Perl, Markdown, HTML

High-Performance Computing: linux/unix cluster administration/computing, parallel computation (MPI, OpenMP), mixed-language development, open-source development.

General Computing: linux/unix, Windows, Microsoft Office, Mac OS.

Modeling: atomistic/molecular simulation, nanoscale transport, quantum chemistry, statistical and non-linear analysis.

Hardware: general computing hardware, linear optics, visible lasers, DI/DO AI/AO interfaces, automation using LabVIEW, high-speed video capture, simple machining, simple circuitry.

PROJECTS

Quantum Mechanics-Driven Prediction of Nanostructure Thermal Conductivity

2011-2013

- Served as an investigator for this project under the Air Force Office of Scientific Research (**AFOSR**) with collaborators at Carnegie Mellon and the University of Pittsburgh.

- Performed simulations and calculations on the Department of Defense's (**DOD's**) High Performance Computing (**HPC**) system, as part of the High Performance Computing Modernization Program (**HPCMP**).

ntpy

2012-Present

- Helped create and maintain this open-source, collaborative effort between members of the Nanoscale

Transport Phenomena Laboratory (**NTPL**) and the University of Toronto.

- Used the code to perform nanoscale transport modeling for the project **disorder** and others.

disorder

2012-2013

- A comprehensive repository of code and data from my PhD thesis, available through Github.

GULP

2012-2013

- Worked with Julian D. Gale at the Nanochemistry Research Institute at Curtin University, Perth Australia.

- Contributed to the development of several subroutines for predicting thermal transport properties.

PRESENTATIONS (15 TOTAL)

- "Evaluation of the Virtual Crystal Approximation for Predicting Thermal Conductivity", **J.M. Larkin (speaker)**, A.J.H. McGaughey, presented at 2013 MRS Spring Meeting San Francisco, CA.
 - "Ordered and Disordered Contributions to Lattice Thermal Conductivity", **J.M. Larkin (speaker)**, A.J.H. McGaughey, presented at 2012 PHONONS Conference Ann Arbor, MI.
 - "Comparison of Spectral Energy Methods for Predicting Phonon Properties", **J.M. Larkin**, A.D. Massicotte, J.E. Turney, C.H. Amon, A.J.H. McGaughey (speaker), presented at 2012 ASME Micro/Nanoscale Heat & Mass Transfer International Conference Atlanta, GA (top 5 technical paper).
 - "Predicting Thermal Conductivity of Defected Systems using the Spectral Energy Density", **J. Larkin (speaker)**, A.J.H. McGaughey, 2011 MRS Fall Meeting Boston, MA.
 - "Predicting Thermal Conductivity of Defected Systems using the Spectral Energy Density", **J. Larkin (speaker)** 2011 Bennett Presentation (Award for Best Presentation).
 - "Statistics of Preferential Particle Concentration in Free-Surface Turbulence", **J. Larkin (speaker)**, M.M. Bandi, W. Goldburg, 2009 American Physical Society March Meeting Pittsburgh, PA.
 - "Turbulent Dynamics of a Hydraulic Jump in two dimensions: Soap Film Flow" **J. Larkin (speaker)**, W. Goldburg, T. Tran, P. Chakraborty, G. Goia, 2008 Meeting of the APS Division of Fluid Dynamics San Antonio, TX.
 - "The Generalized Fractal Dimensions of a 2-D Compressible Turbulence", **J. Larkin (speaker)**, M.M. Bandi, W. Goldburg, 2008 American Physical Society March Meeting New Orleans, LA.
-

AWARDS

Northrop-Grumman Fellow, Carnegie Institute for Complex Engineered Systems (ICES)

2011

NSF Graduate Student Research Grant, University of Pittsburgh Dept. of Physics

2007-2009

MEMBERSHIPS

American Physical Society, American Society of Mechanical Engineers, Materials Research Society, Society of Industrial and Applied Mathematics, DOD High Performance Computing Modernization Program.
